

Corrigendum

In our paper entitled “Efficient parameter search for qualitative models of regulatory networks using symbolic model checking”, published in *Bioinformatics*, we identified the following two mistakes.

- Regarding the detailed parameter constraints given for property φ_1 in the supplementary text

(Section 4), in the second of the 14 constraints listed on page 5, one should read $\frac{\kappa_{Gal80}^0 + \kappa_{Gal80}}{\gamma_{Gal80}} < \theta_{Gal80}$ instead of $\frac{\kappa_{Gal80}^0}{\gamma_{Gal80}} < \theta_{Gal80} < \frac{\kappa_{Gal80}^0 + \kappa_{Gal80}}{\gamma_{Gal80}}$.

- Regarding the parameter constraints given for property φ_2 in Table 1, rightmost column, one

should read $\frac{\kappa_{Gal80}^0}{\gamma_{Gal80}} < (\theta_{Gal80}, \frac{\kappa_{Gal80}^0 + \kappa_{Gal80}}{\gamma_{Gal80}})$ instead of $(\frac{\kappa_{Gal80}^0}{\gamma_{Gal80}}, \theta_{Gal80}) < \frac{\kappa_{Gal80}^0 + \kappa_{Gal80}}{\gamma_{Gal80}}$.

We would like to apologize for the mistakes and to thank Samuel Chorlton and Laurent Trilling for pointing them out.
