

## What the Zorgl'hub does not offer:

- . **Production of new transgenic or mutant zebrafish lines:** for this, users are referred to the [GIS AMAGEN](#) ; the lines can then be imported to the Institut Pasteur fish facility to conduct the project (Note that this would require at least 6 months);
- . **Behavior analyses:** for this, users are referred to the [AMATrace platform](#) ;
- . Application to the ethics committee for animal experiments (necessary when manipulating animals > 5 days-post-fertilization), which you will need to take care of yourself. Before applying, please contact the zebrafish welfare structure (sbeazip@pasteur.fr).
