

INTERNATIONAL SCIENTIFIC CONFERENCE

130 Years of Institut Pasteur Celebrating Science

May 15-17, 2019, Institut Pasteur, Paris

The Conference “130 Years of Institut Pasteur: Celebrating Science” is a key international meeting held at the Institut Pasteur that aims to celebrate the exciting scientific discoveries and advances in science achieved by thousands of people who have been working at the Institut Pasteur within the last 130 years.

This three days meeting will cover the different research fields studied at the Institut Pasteur, spanning from infectious diseases to neuroscience, genetics, genomics, and bioinformatics, developmental biology, immunology and cell biology. Young scientists as well as established researchers from the Institut Pasteur, together with invited, world leaders in the different research fields, will present a wide range of current research highlights and future trends.

WEDNESDAY, MAY 15

Welcome by Stewart Cole

Opening lectures by: Françoise Barré-Sinoussi, Philippe Sansonetti, Yasmine Belkaid

THURSDAY, MAY 16

Session 1: A journey from molecules to cells

Keynote: Michael Hall

Session 2: Individuals, populations, the power of modelling

Keynote: Lluís Quintana-Murci

Session 3: An integrative vision of health and disease

Keynote: Christine Petit, Michael Rosbash, Jean-Pierre Changeux

FRIDAY, MAY 17

Session 4: Microbes and Hosts

Keynote: Michel Nussenzweig

Session 5: Translating discoveries from bench to patients

Keynote: Anne Dejean

Closing lecture: Pascale Cossart
