

CALL FOR RESEARCH PROJECTS

First call for a 2-year post-doctoral Japanese fellowship for young scientists willing to work at Institut Pasteur (step 1)

GUIDELINES

GENERAL INFORMATION

To promote scientific cooperation between Japan and France, Institut Pasteur offers its research entities the possibility of hosting – starting in fall 2019 and for a **2 year-period** - a **postdoctoral fellow having conducted her/his higher education (including her/his PhD) in Japan. This fellowship is co-funded by Institut Pasteur, the French Embassy in Japan and the Japan Pasteur Foundation.**

To this aim, Institut Pasteur launches an internal call for research projects. This call is open to scientists from Institut Pasteur (Paris) interested in hosting and training in her/his laboratory (Institut Pasteur Host Laboratory) a young researcher, having conducted her/his higher education (including her/his PhD) in Japan, through this postdoctoral fellowship opportunity.

- **Application submission deadline is: June 7, 2019**
- **Announcement of the short-list of selected scientific research projects: June 21, 2019**

Up to five projects will be selected for a second stage whereby each selected scientist will promote the application of one postdoctoral fellow. One fellowship will be awarded.

ELIGIBILITY CRITERIA

Applicants must be a permanent researcher working in a research entity of Institut Pasteur located in the Paris Campus.

APPLICATION SUBMISSION

The completed 2-page application should be e-mailed **in one single PDF file** to boursepdjapon@pasteur.fr

The application form includes a one-page description of the proposed research project and its significance and a one-page description of the motivation of specifically hosting a postdoctoral fellow having conducted her/his higher education (including her/his PhD) in Japan and how the research program will strengthen Franco-Japanese scientific cooperation. The application should also include confirmation by the head of the Institut Pasteur Host Laboratory (if not the applicant) that she/he agrees to with the application.

SELECTION PROCESS

An internal selection committee will assess all eligible applications. This committee will both consider the scientific excellence and how the proposed project will strengthen the cooperation between France and Japan.
